The Radical Art Template was created as an android development self starter guide for anyone interested in publishing art/photos on Android. It assumes you can set up Android Studio on your own and run the sample applications included with it. The Radical Art Template application itself is good as a reference but you will want to start a new project to include your own assets and a unique package name. From there most of the source, if not all, will transfer over and you can export your own .apk file that is needed to complete your own storefront listing.
